PROJECTS

git status | Developer | Designer | [Code](#) | [Demo](#)   3/2022
A website where a user can login with their Github account and view their account statistics for their profile, contributions, repositories, and also have a task management board for organization.
  - Designed and created wireframes before development and applied CSS and Chart.js visuals.
  - Utilized Firebase to setup Github login authentication and Firestore for database storage.
  - A data visualization app developed using **Github API** and a tech stack of **JavaScript**, **React**, **Firebase**, **Chart.js**, **Bootstrap**, **HTML**, and **CSS**.

iHOPie | Developer | Designer | [Code](#) | [Demo](#)   3/2022
A shopping website where a user can create an account, browse through products, add items to their shopping cart and checkout.
  - Wireframed the layout of the website before development and implemented all CSS.
  - Setup authentication with JWT and bcrypt, with a cart that persists through different users.
  - A CRUD app developed using **JavaScript**, **React-Redux**, **Express**, and **Sequelize**.

Spot the Difference | Sole Developer | Designer | [Code](#) | [Demo](#)   2/2022
A simple, straightforward spot the difference game where the player has slightly over a minute to win.
  - Created all artwork/assets and designed the layout of the game.
  - A game developed using vanilla **JavaScript**, **HTML**, and **CSS**.

EXPERIENCE

Freelance Graphic Designer / Illustrator   6/2015 – Present

  - Created, developed, and delivered branding materials (logos, banners, posters, books, etc.) and illustrations across a variety of organizations, including *Paid to Proofread, Urban Body Fix,* and *Happy Home Senior Center*.
  - Led and involved in processes of product design (such as the digital and print publication of books).
  - Improved UI / UX design and functionality for client websites.
  - Managed multiple projects at a time while still meeting deadlines and keeping in communication with clients regularly.
